

# Ending or Extending Classwise Sessions

Last Modified on 2022-Jul-08 6:23:35 BST

This article is intended for **Teachers**.

## Extending Scheduled sessions

A scheduled session is created in advance of a class by using the [Add schedule](#) feature on your Class Settings.

Scheduling a session means that the selected class will automatically start and stop on the same day(s), at the same time(s), until you change the schedule. If you schedule a session for Monday from 08:00am to 09:30am, your class will run every Monday during that time.

### Class settings - my classroom

Students	Teachers	Scheduling	Invitation Code
----------	----------	------------	-----------------

Class schedules define when you teach a particular class. When using schedules, Classwise automatically starts the class session for you.

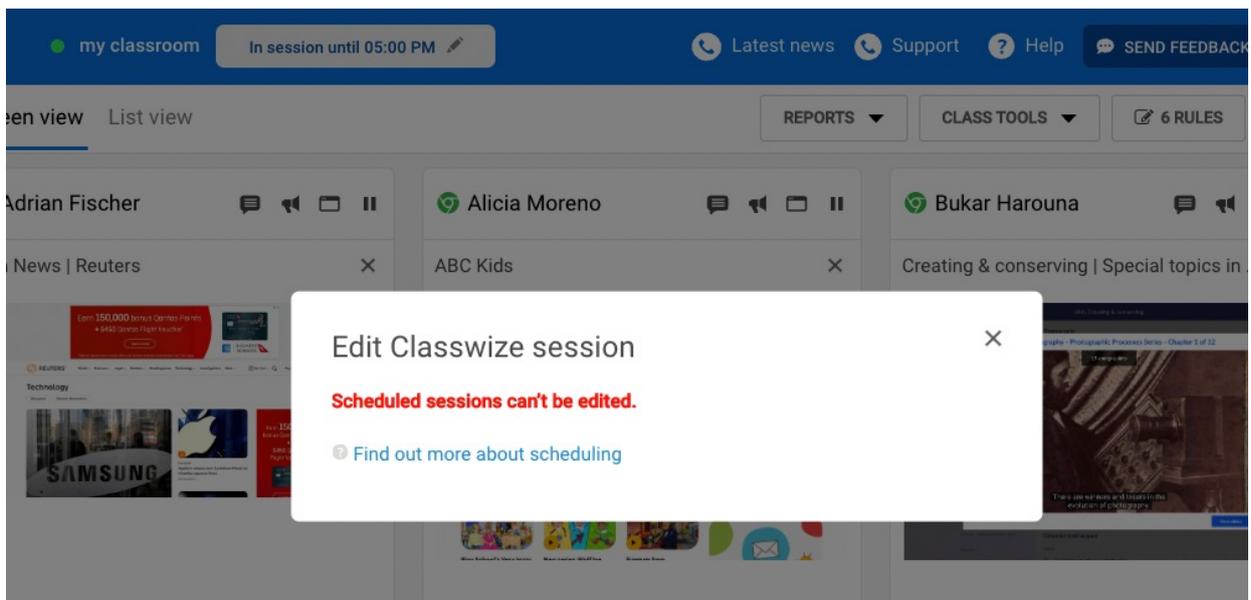

[ADD SCHEDULE](#)

<b>✘</b>	<b>Monday</b>	x ▾	<b>08:00</b>	x ▾	<b>09:30</b>	x ▾
<b>✘</b>	<b>Tuesday</b>	x ▾	<b>08:00</b>	x ▾	<b>09:30</b>	x ▾

[SAVE](#) [DELETE CLASS](#) [CANCEL](#)

## Editing a scheduled session

You can't change the end time of a scheduled session once it's started. To change the start or end time of a scheduled session, wait until the class has ended, and then go to the Scheduling tab of your class settings.

## Extending unscheduled sessions

Unscheduled sessions are classes that run only once and end at the time that you set. You can start an unscheduled session by opening a class and selecting the **START CLASS** button on your Classwise toolbar, or selecting the **START CLASS** on a class tile from your Classwise dashboard. The session will start immediately.

Your browser does not support HTML5 video.

## Editing an unscheduled Classwise session

You can edit these unscheduled sessions once they've started, ending them early or making them run longer.

1. Select the **In session until** button.
2. The *Edit Classwise* session dialog will appear. Select the **new time** from the dropdown.
3. Select **SAVE**.

Your browser does not support HTML5 video.

**Tip:** Selecting **END NOW** will end the session immediately.

### Working with Classwise Rules during scheduled and unscheduled sessions

You can create, edit, and delete rules for your class at any time, and Classwise will automatically save them. However, rules for a class apply only when that class is in session, even if you create them before the session starts.

For more information about how Rules work, see:

- [How Rules Work](#)
- [Introduction to Classwise Rules](#)
- [Classwise Rules FAQ](#)
- [Creating Rules in Block Rules Only Mode](#)

## Troubleshooting

### I can't edit multiple classes at once

There is no bulk edit feature for multiple classes. You will need to schedule sessions for each class individually. However, you can schedule multiple sessions for a single class at once.

### I can't edit a scheduled class once it has started

You can't edit a scheduled session once it's started. This is to stop it from running into other scheduled sessions, which could cause students to appear in two classes at once.

### I got an "Unable to add schedule due to time restrictions set by your school" error

Your school or school district has set limits on when teachers can schedule classes, usually to make sure classes aren't scheduled outside of school hours. If you keep getting this error, please contact your local IT support.
