

Classwize Release 2022-001

Last Modified on 2022-Jan-21 4:59:24 GMT

Welcome to Classwize Release 2022-001!

This update includes a way for you to send feedback to the Classwize Product Team directly from any Classwize screen, plus a few improvements to Classwize's load times and user interface.

Send Feedback

We're introducing the SEND FEEDBACK feature so you can tell us about your experience and request new features. Your feedback will help us improve Classwize for everyone!

Better Look and Feel

We tweaked a few things in the background to give links and other visual elements a more consistent look and feel.

Faster Load Times

We've fixed a bug that caused an issue with loading classes for some schools. Now Classwize loads faster, especially for school districts that have a large number of classes.
