

Classwize Release 2022-004

Last Modified on 2022-May-02 10:29:16 BST

Welcome to Classwize release 2022-004!

This release of Classwize helps you better manage your class with an updated **Pause Internet** feature.

New Features

- **Monitor your students' offline activities while pausing the Internet (Windows & Mac)**

Pausing the Internet for students using Connect for Windows or Mac lets you stop them from browsing the Internet and still observe what they are doing offline.

- **See the "Internet Paused" indicator**

When you pause the Internet for a student or the class, the "Internet Paused" indicator will appear on their student tile and Live View. This indicator tells you who is temporarily unable to browse the Internet.
